

**DE618TN** 8Ω

## **HF Drivers** - 1.4 Inches

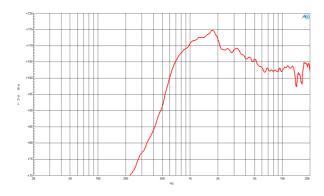

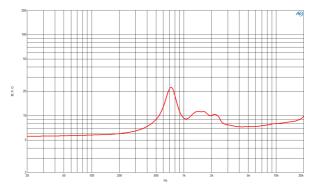

- 160 W continuous program power capacity
- 1.4" horn throat diameter
- 65 mm (2.5 in) aluminium voice coil
- Titanium diaphragm
- 1000 18000 Hz response
- 108 dB sensitivity
- Ferrite magnet assembly with shorting copper cap

The DE618TN is the ferrite magnet version of our premium DE680TN. The diaphragm in this model has been completely redesigned to incorporate a bent edge voice coil former, as well as new dome and surround geometry. These modifications combine to better control diaphragm displacement and deformations, resulting in lower distortion and a smoother higher frequency response above 10kHz.

# **DE618TN**

#### MOUNTING AND SHIPPING INFO

Four M6 holes 90° on 102 mm (4 in) diameter	
Overall Diameter	156 mm (6.14 in)
Depth	66 mm (2.6 in)
Net Weight	3.8 kg (8.38 lb)
Shipping Units	1
Shipping Weight	3.92 kg (8.64 lb)
Shipping Box 190x190x80 mm	(7.48x7.48x3.15 in)
Other Details 4x M6 Mounting Studs with bolts and washers included	

Driver mounted on B&C ME90 horn.
2. 2 hour test made with according to the control of t 2. 2 hour test made with continuous pink noise signal within the range from the recommended crossover frequency to 20 kHz. Power calculated on rated minimum impedance.
3. Power on Continuous Program is defined as 3 dB greater than the Nominal rating.
4. Applied RMS Voltage is set to 2.83 V for 8 ohms Nominal Impedance.
5. 12 dB/oct. or higher slope high-pass filter.
